BIG IDEAS

Nationalist movements can unite people in common causes or lead to intense conflict between different groups.

The rapid development and proliferation of technology in the 20th century led to profound social, economic, and political changes.

The breakdown of long-standing empires created new economic and political systems.

World History 12 introduces you to the history of the twentieth century, beginning with the treaties that ended World War I and ending with the collapse of the Soviet Union in 1991. While studying these events, you will also be learning something of the skills necessary to interpret historical events -- how to ensure historical information is accurate and relevant, how to develop historical empathy, and how to present clear, logical arguments based on a knowledge of the events, for example. These skills will be helpful to you throughout life.
