OVERVIEW

The Big Ideas, Content, and Curricular Competencies for this course can be found here: [Fashion Industry 12](#)

Big Ideas

Design for the life cycle includes consideration of social and [environmental impacts](#).

Personal design interests require the evaluation and refinement of skills.

Tools and technologies can be adapted for specific purposes.

Fashion Industry 12 is a course that is rich in content which provides a solid foundation for students to build individual and possibly group projects. Three units including “What is Fashion, The Business of Fashion and Fashion Design combine to inform the student who then showcases their understanding in a series of Projects.

Unit 1	What is Fashion?
Unit 2	The Business of Fashion
Unit 3	Fashion Design
Unit 4	Projects

Use the course choice projects to enhance your understanding of areas of interest. Make sure you carefully select projects that interest you and that you are excited about. If you do not find projects that excite you or stoke your fire, then brainstorm your own potential Fashion Project or Projects and run your ideas by your instructor.

Keys to Success:

1. Actively work through each lesson, completing your Learning Guide and reflecting on Fashion Industry content. Consider a potential career in fashion, and which aspects of the industry really gets you excited.
2. Use the Learning Guide as your tool for documenting your understanding. Lay it out neatly and well organized. Feel free to collect additional research and document it in your Learning guide. This would include areas of Fashion that you review on your own if one of the Lessons leads to the rabbit hole of research on the web.
3. Make sure you understand all project requirements.
