The rapid development and proliferation of communication and transportation technologies in the 20th century led to profound changes in personal and national identities (adapted from 20th Century World History 12).	Indigenous peoples are reclaiming mental, emotional, physical, and spiritual well-being despite the continuing effects of colonialism (from Contemporary Indigenous Studies 12).
Religion can powerfully shape social, political, legal, and environmental values (from Comparative World Religions 12).	The implementation of economic theories has profound effects on social and political decision making and movements (from Economic Theory 12).	The intentional destruction of peoples and their cultures is not inevitable, and such attempts can be disrupted and resisted (from Genocide Studies 12).	A society's laws and legal framework affect many aspects of people's daily lives (from Law Studies 12).	Examining questions in philosophy allows people to question their assumptions and better understand their own beliefs (from Philosophy 12).	Social justice initiatives can transform individuals and systems (from Social Justice 12).	Decision making in urban and regional planning requires balancing political, economic, social, and environmental factors (from Urban Studies 12).
